Opening Systems by Scigno

Market leader since 1987

For over 30 years, Scigno has been making sliding and swing opening systems. Innovative, practical and versatile design solutions entirely manufactured in Italy which improve quality of life.

THE FIRST SCRIGNO DOOR

In 1989, Scigno patented the metal-framed pocket door system: for the first time, a door disappeared inside a wall.

AMONG THE BEST-KNOWN*

Recent market research shows that Scigno is the brand recognised as leader in the Opening Systems market, both by consumers and professionals.

THE MOST RECOMMENDED*

Over 90% of customers who chose Scigno would recommend the brand, as they are completely satisfied with the product.

(*) Online survey of 1,017 consumers, November 2023

SCRIGNO

Design and quality Made in Italy.

Since 1989, Scigno has stood out for its inimitable approach to innovative design, as well as its design expertise. This expertise is recognised all around the world as the most authentic expression of Italian-made products, the result of constant R&D and superior manufacturing quality. This creative leadership in the opening systems market is today regularly expanded by numerous partnerships with important designers, interior designers and architectural studios in Italy and around the world: this is what leads to the consistent birth of new ideas which are able to open up living spaces, freeing the creativity of those who design them, and the emotions of their residents. Because our mission is to grasp the spirit of every project and to build real value in day-to-day living.

Lacquered Line

SLIDING LACQUERED

Our lacquered doors are the ideal option both for modern and more traditional living spaces. They offer extensive customisation possibilities through a huge range of colours and finishes. The versatility of these doors is a distinctive feature which allows them to perfectly adapt to a range of aesthetic and functional requirements.

GRANLUCE

COLORS RANGE

This model designed by Scigno offers a smooth door with flawless surfaces, available in two different options: a refined matt lacquer, and a gloss lacquer which reflects light in an appealing fashion. Also available in a matt lacquered open-pore ash version to add a touch of warmth and natural finish to the room. The available colour range includes eight standard RAL colours, with all RAL finishes available on request.

SWING LACQUERED

The solution with doorposts is perfect for more traditional environments, but also adapts well to more modern contexts thanks to the possibility of customising the height of the panels and the colours. Lending character to any living space, it is available in standard colours and any RAL colour on request.

Laminated Line

SLIDING LAMINATED

Scrigno offers a huge range of extremely modern, sober and refined solutions which respond to the most contemporary market trends. Ideal for those looking for sliding doors in high-quality laminated wood with aesthetic impact.

They are an excellent choice for those looking for doors with an elegant design and reliable performance.

COUNTER-FRAME COMPATIBILITY

- Magnifico
- Maestro
- Scrignotech
- OpenBox

SLIDING LAMINATED FOR XTERNA

The external wall sliding solution Xterna by Scrigno combines strength and light weight, guiding light and sound between rooms without the need for structural work. It separates living spaces without taking up excessive space, and is easy to install. Robust and versatile, it adapts to different furnishing styles, becoming an aesthetic and functional element.

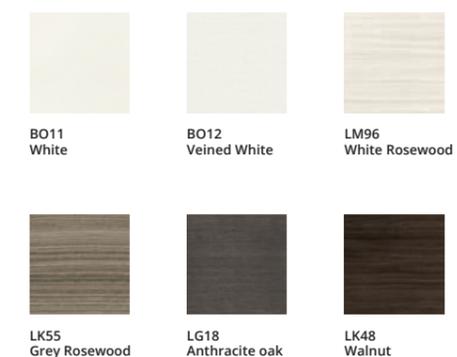

SWING LAMINATED

Swing door which successfully meets more standard requirements in terms of dimensions and finishes.

An offering which is modern in style, with concealed hinges as standard and which is perfectly flush with the edging trim on the opening side.

COLORS RANGE

The panel features a strong solid spruce frame and is covered with laminate finishes. White laminate, white or grey rosewood, white veined, anthracite oak or walnut, each adds its character and warmth to the environment. A functional and tough door, but also a design element which can transform any living space into an elegant and stylish environment.

SWING

Eletta

Eletta, Scigno's glass swing door, combines form and function.

It has bold aesthetics, is available in different shades, and features an aluminium structure with seven possible finishes.

Eletta is robust and sober, suited to dividing and combining any type of living space.

Its reflections and clean lines connect rooms in an elegant fashion.

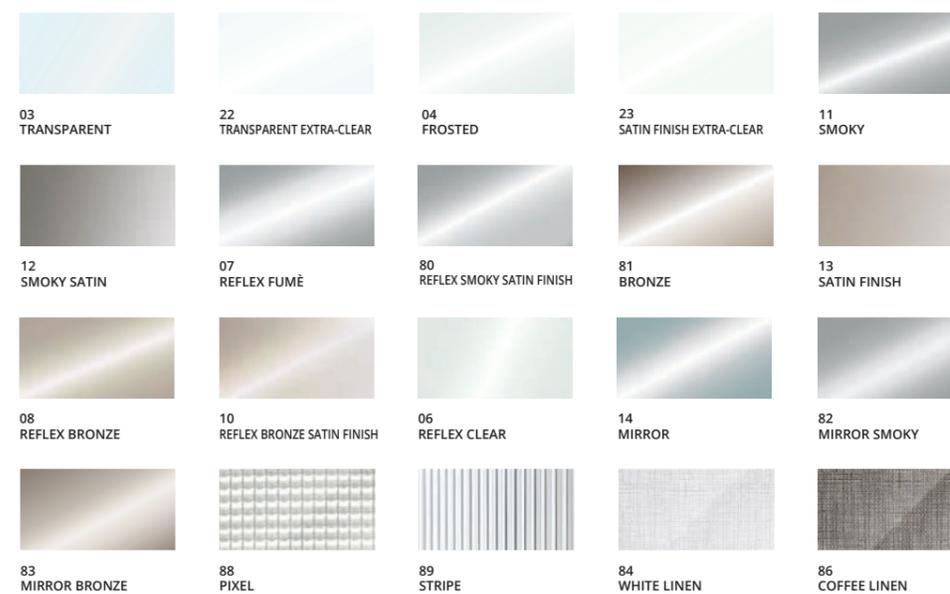

DOOR FRAME AND COVER/HANDLE FINISHES

The transparency and reflections created by the glass, along with its clean lines, create a continuum between the rooms, allowing light to flow in a sophisticated visual effect.

In the lacquered versions, however, the light is screened and does not filter into the environment at all. The aluminium profiles frame the panel, giving the door a leading role in the interior design.

GLASSES

LACQUERED

SLIDING Acqua

The Acqua door brings together glass and aluminium to enhance and enrich any living space with elegance and refinement, whatever the overriding style. Available in a wide range of variants, its finishes can be selected from a rich palette of available shades.

COUNTER-FRAME COMPATIBILITY

- Magnifico
- Maestro
- Scrignotech
- OpenBox

DOOR FRAME AND COVER/HANDLE FINISHES

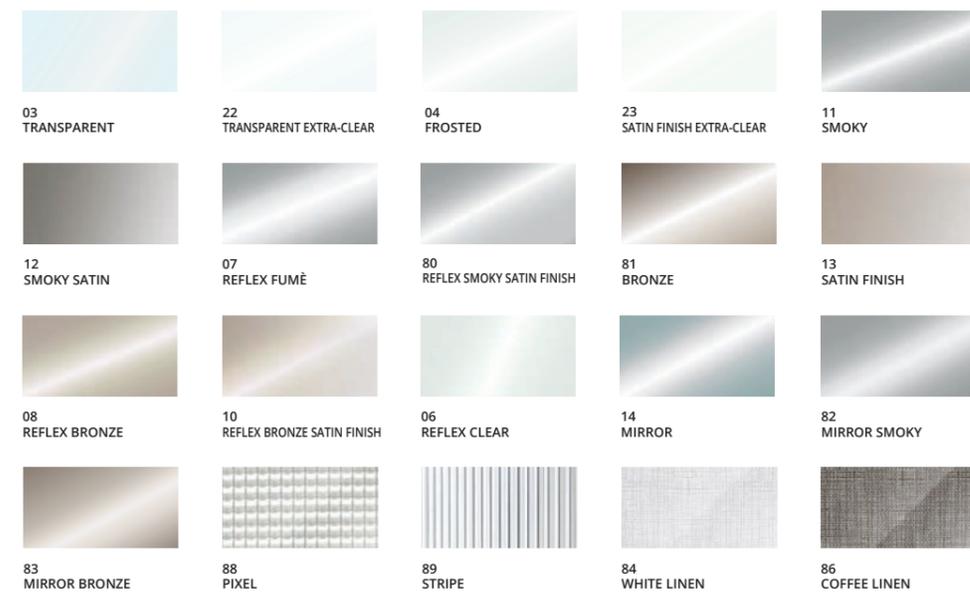

The glass leaf which sets the Acqua door apart is available in transparent, satin, reflex, smoked or bronze glass, and is also available in mirror version, in addition to a wide range of shades which can be selected for the lacquered glass version, in gloss or satin finish.

In order to meet the widest range of requirements, the available palette has been expanded to include new, modern finishes such as rigo, pixel, white linen and coffee linen.

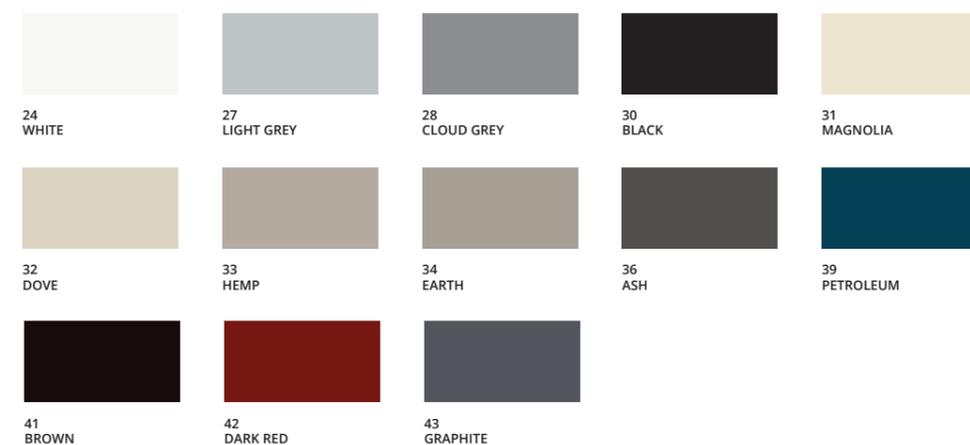

The aluminium profiles can also be customised.

GLASSES

LACQUERED

SLIDING Aria

SLIDING ARIA

Designed to make living spaces exclusive, these offerings represent the peak of innovation in the glass door sector. A simple and elegant design allows living spaces to be defined discreetly, between transparency and reflections.

COUNTER-FRAME COMPATIBILITY

- Magnifico
- Maestro
- Scrignotech
- OpenBox

SLIDING ARIA FOR REMIX

COUNTER-FRAME COMPATIBILITY

- Remix

DOOR FRAME AND COVER/HANDLE FINISHES

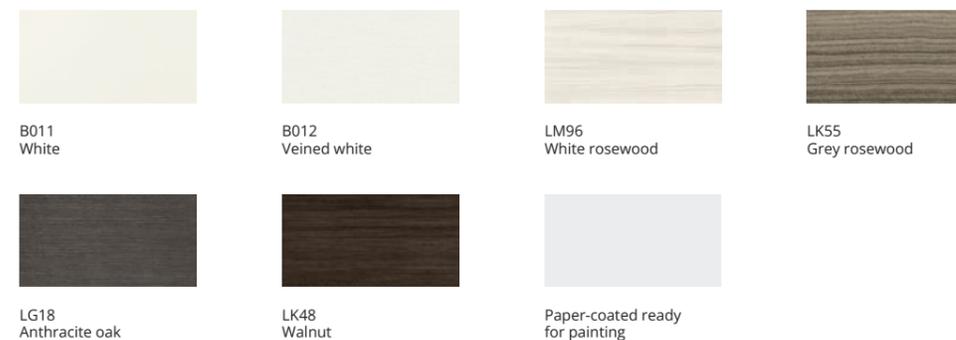

The glass leaf which defines the Aria door is available in finishes including transparent, acid-etched, extra-clear transparent, extra-clear acid-etched, bronze, acid-etched bronze, smoked grey, acid-etched smoked grey, and black.

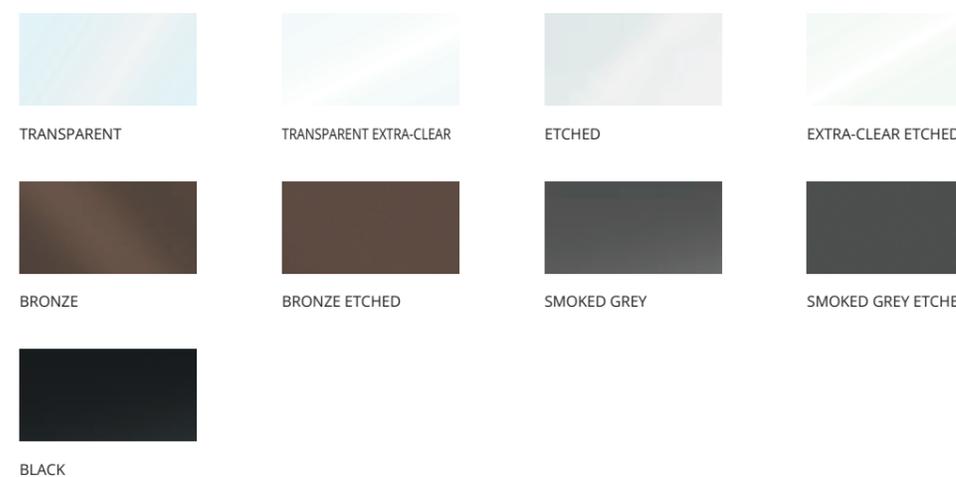

REMIX DOORPOSTS

MELAMINE DOORPOSTS

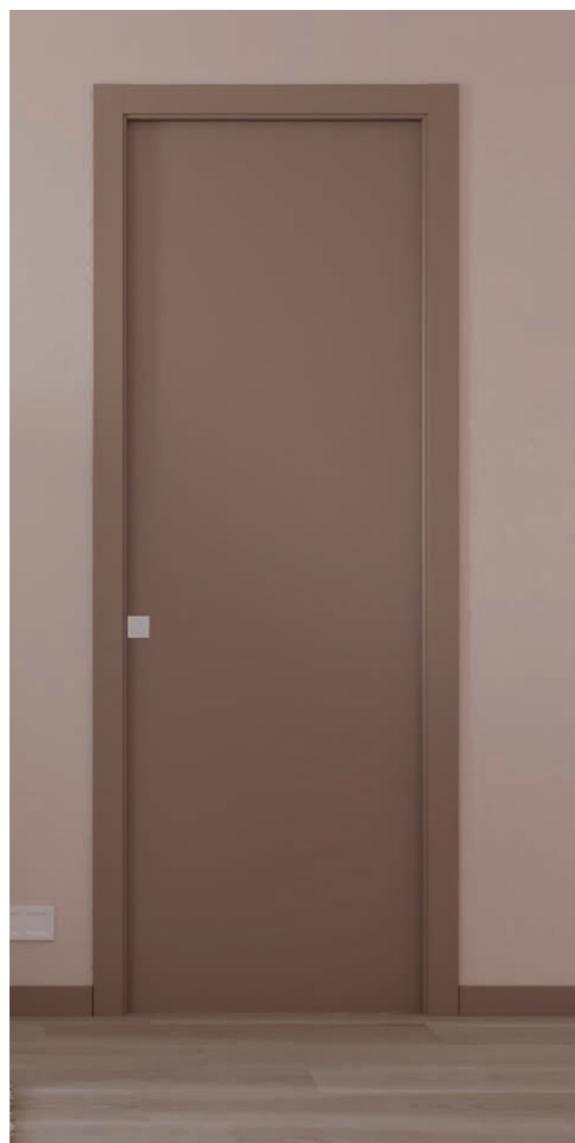

GLASSES

Acoustic System

In order to provide the highest levels of comfort, soundproofing plays a key role in the design of living spaces. Scrigno has created an exclusive and complete system which combines quiet and high design. The solution is tested to EN ISO 10140-2: 2010 and EN ISO 717-1: 2013, standards which regulate the measurement and laboratory testing of soundproofing of buildings and their components.

SLIDING ACUSTICA

The acoustic solution with doorposts, designed to isolate any living space from noise sources, provides a sound reduction of up to 39 dB when tested in plasterboard partitions of finished thickness of 100/125 mm. The system is composed of Maestro counter frame, edging trims, acoustic door leaf and doorposts, dedicated hardware and chiudiscrigno kit.
